

## **SonicWALL announces next generation Managed Service Provider (MSP) programme for UK and EMEA resellers**

Chertsey, UK – 9th September, 2009 – SonicWALL, Inc. (NASDAQ: SNL), a leading secure network infrastructure company, today announced an updated version of its Managed Service Provider (MSP) programme that will enable UK and EMEA resellers to offer their customers additional managed services and create new revenue opportunities.

SonicWALL's MSP programme allows resellers to provide customers with a range of easy to-use security solutions including email security, Continuous Data Protection and Unified Threat Management. These solutions are offered to customers as part of a paid-for managed service which can be controlled by the reseller from one centralised location.

To coincide with the announcement, Concorde Informatics Ltd, a leading IT service and solutions provider, was today named as the first UK partner to join the next generation MSP programme. "We are delighted to be recognised for the considerable investment we have made in the development of our managed services and are very excited about the opportunities they present," said Colin Meakin, Managing Director of Concorde Informatics. "As an MSP, we are now able to offer our customers services like Managed Data Protection, Service Management and recovery, all to a subscription that fits their budget."

"We understand that managing network security and data is a necessary but often overwhelming task for smaller organisations," said Andy Zollo, sales director for Northern Europe at SonicWALL. "Through the MSP programme, partners are able take advantage of this rapidly growing market by offering customers proactive security management and monitoring systems which are highly scalable regardless of the businesses size or complexity."
